Work Experience

Front End Developer Intern May 2017 - May 2018

IBM ICS
Littleton, MA

- My main task throughout the summer was to research if theme customization for IBM Connections was possible via a proxy server injecting stylesheets to the responses sent to the users.
- After creating initial demos for customization, this project was assigned a team and I stayed for the whole senior year of my college as a part time employee working remotely to help the team to make it accessible to everyone using Connections.

51-328 Teaching Assistant Jan 2018 - May 2018

Advanced Web Design
Carnegie Mellon University

- As the only assistant, helped a class of 20 students with their web design & development questions and troubleshooted problems.
- Ran courses and taught advanced concepts in web development as well as the latest trends & improvements.

15-150 Teaching Assistant Jan 2017 - Dec 2017

Functional Programming
Carnegie Mellon University

- The teaching assistants for Functional Programming class were chosen according to their knowledge about the course material and skill at helping others learn difficult concepts and ideas.
- Led labs and lectures in addition to assisting students at office hours.
